

# PARTS AND SYSTEMS SUPPLY

Repaircraft was founded in the 1940's to overhaul flight instruments, sub-assemblies and test equipment for Spitfire, Hurricane and Lancaster aircraft.

In 1964 the Repaircraft Supply Division was established specifically to provide a spare parts procurement and supply service for the UK Ministry of Defence, Overseas Governments and Defence Contractors throughout the world.

Repaircraft now supply parts and systems for European defence and aerospace equipment of almost any type or make.

Components can be supplied as spare parts or for use in new production builds. In many instances Repaircraft can even supply parts for out of service or obsolete equipment.

Repaircraft also provide "Procurement Management Services". In this role Repaircraft take overall responsibility for the procurement, supply and delivery of a complete package of parts for a particular project or requirement. This service provides a highly cost effective and efficient single source for all parts supply requirements.

In short, by combining our staff of highly trained and experienced researchers, engineers, buyers and quality assurance inspectors, together with a highly sophisticated and fully integrated computer operations and management system Repaircraft are able to offer total support.

Spitfire MK XII as supported by Repaircraft in the 1940's

# TECHNICAL CAPABILITY AND EXPERTISE

Repaircraft have one of the most comprehensive and sophisticated databases in Europe.

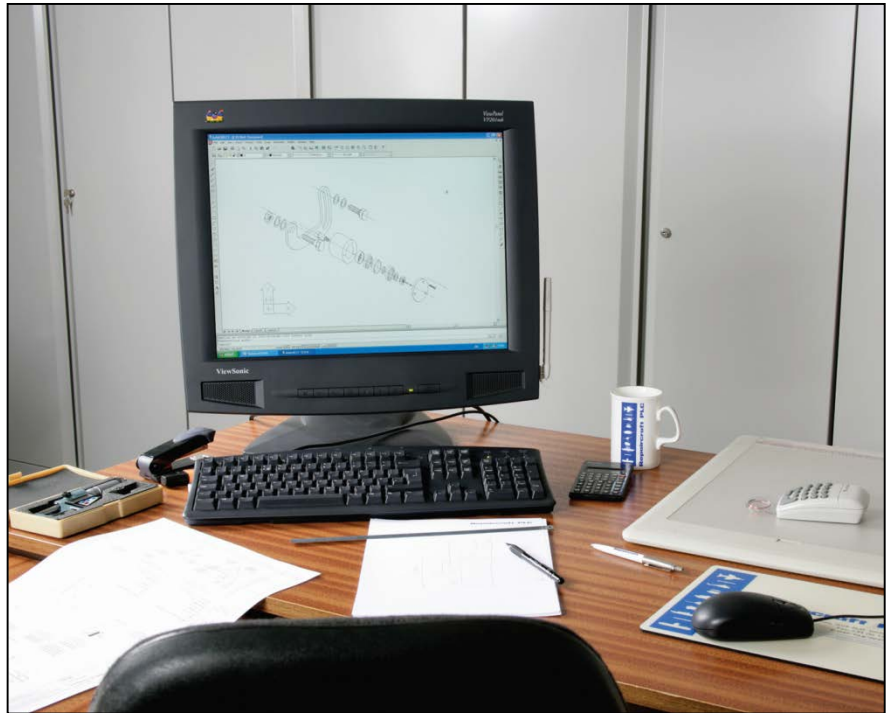

Data is held on over 20 million different items and Repaircraft's archives even contain information relating to equipment manufactured in 1915!

Repaircraft also now have associate companies throughout the world which give the company an unparalleled ability to source and supply parts and material for equipment of almost any nationality, type or make.

For equipments that are likely to suffer obsolescence problems due to Diminished Manufacturing Sources (DMS) Repaircraft can provide fully computerised Obsolescence Surveillance Services (OSS) to track and monitor availability of all critical components and to procure "Last Time Buys" where appropriate.

For unavailable or obsolete items the Repaircraft Technical Division can either design and manufacture a replacement or redesign the parent equipment to accept a modern alternative.

The Repaircraft Technical Division also offers a wide range of overhaul and repair services.

The Repaircraft databases hold data on over 20 million items

# LAND ....

Repaircraft supply parts and systems for all types of Fighting Vehicles, Missile Launchers, Artillery, Bridging Equipment, Transporters, Trucks, Trailers, MRAP Vehicles, Refuellers, Generators, Communications Equipment, Surveillance Equipment etc.

Service Kit manufactured for 155mm howitzer

Scorpion light tank

Part of a missile system spare parts package

105mm Light gun being transported by a Puma helicopter

Rapier missile launch

# SEA ....

Repaircraft supply parts and systems for all types of Ships, Submarines, Hovercraft, Patrol Boats, Torpedoes, Mines, Missiles, Armaments, Radar, Sonar, Diving Equipment, Mechanical Handling Equipment etc.

Oil filled shock resistant transformers and various electrical components for a naval radar maintenance project

U.K. Royal Navy HMS Diamond Type 45 destroyer

Type 23 frigate

Type 209 Submarine

Circuit boards for computerised data logging system

# AIR ....

Repaircraft supply parts and systems for all types of Aircraft, Helicopters, Missiles, Armaments, Avionics Equipment, Surveillance Equipment, Ground Support Equipment, Training Simulators etc.

Specialised Paints, Sealants, Adhesives and Lubricants etc. supplied by Repaircraft

Lynx Helicopter armed with TOW missiles

Selection of components from a Repaircraft modification/upgrade project

U.K. Royal Air Force Hawk

U.K. Royal Air Force Typhoon

# QUALITY ASSURANCE

Repaircraft hold various Approvals including:

# ADDITIONAL SERVICES

In addition to the straightforward supply of Spare Parts, the Repaircraft Supply Division also provides the following services:

## **PROCUREMENT MANAGEMENT SERVICES**

Procurement Management Services, with full Electronic Data Interchange (EDI) facilities where required, for Governments and Industry wishing to "Outsource" responsibility for the Sourcing and Supply of all parts.

## **OBSCOLESCENCE SURVEILLANCE SERVICES®**

Identification, Monitoring and Warning of component items that could suffer from Diminished Manufacturing Sources (DMS) or Obsolescence.

## **CONSIGNMENT STOCK MARKETING**

The marketing on a profit sharing basis of excess Inventory/Stocks on behalf of Governments or Industry.

## **DISTRIBUTION AND STOCKHOLDING SERVICES**

The Distribution and Stockholding of spare parts for companies that wish to "Outsource" responsibility for these activities.

## **PRODUCT ACQUISITION AND LICENSING**

The Acquisition and Licensing of non-core or mature product lines.

## **REPRESENTATION SERVICES**

The representation of Foreign Defence and Aerospace companies in the U.K. and the representation of U.K. companies Overseas.
